

Standard & System Attributes for Opportunity Entities

wDescription [↗](#)

The Opportunity Entity comes with **predefined standard attributes** to ensure consistency across all environments. Additionally, users can **add custom attributes** to capture organization-specific data. The system maintains **system attributes** that are automatically tracked for auditing and operational purposes.

- Standard attributes are **created in every environment**.
- Users can configure whether most attributes are **required to complete**, except for **Name and Team**, which are always required and can't be changed.
- All mandatory attributes are visible in the Opportunity Entity dialog.
- System attributes are stored in the backend and will not be displayed in the frontend (for now).

Languages [↗](#)

Users need to be able to add the translation of every attribute in the three supported languages.

Internal name [↗](#)

- Do we need an internal name displayed in the UI for each attribute? I see Salesforce has that but not every other platform has it. If it's not there, it needs to be accessible from somewhere else (like API documentation) by the users. They will need this for integration purposes.

Standard Attributes (Predefined in Every Environment) [↗](#)

These attributes are **created** for every Opportunity Entity and can be set as **required** by users, except for **Name and Team**, which are always mandatory.

Attribute Name	Type	Description (this column doesn't appear in Qollabi UI)	Required
Name	Text (plain)	The official name of the opportunity.	Yes (this can't be changed)
Description	Long text (plain, later on we'll introduce Rich text)	A brief description of the opportunity.	No (Configurable: admin can make it either required or optional)
Owner	User (Single-select) → <i>What I mean is that a 'user' with an account needs to be selected. And only one user can be selected.</i>	The primary user responsible for managing the opportunity entity.	Yes (Configurable: admin can make it either required or optional)

Team	User (Multi-select) → What I mean is that a 'user' with an account needs to be selected. And multiple users can be selected.	Users associated with the opportunity entity.	Yes (this can't be changed)
Customers	Customer relationship (Many-to-one)	Many-to-one relationship. Many opportunities can be attached to one customer. The same opportunity can't be attached to more than one customer.	No (Configurable: admin can make it either required or optional)
Partners	Partner (Many-to-many)	Many-to-many relationship. Many opportunities can be attached to many partners. The same opportunity can be attached to more than one partner. The same partner can be attached to more than one opportunity.	No (Configurable: admin can make it either required or optional)
Amount	Currency	The estimated total sale amount. In all the Qollabi lists where this amount is present, the amount field can sum up all the opportunities' amounts in that list (see the example below).	No (Configurable: admin can make it either required or optional)
Stage	Single-select	Options we create by default in this field: • Closed-Won • Closed-Lost	No (Configurable: admin can make it either required or optional)

		They can edit/delete these options and create their own.	
Probability	Percent	The likelihood that opportunity will close, is stated as a percentage.	No (Configurable: admin can make it either required or optional)

Relationship attributes [🔗](#)

Relationship attributes allow you to connect records and show the bidirectional relationship between them. Updating the value of an entity attribute on one record will also automatically update the value on any connected records.

Lists & Summary [🔗](#)

Amount: [🔗](#)

The amount attribute will be present in all environments with the opportunity entity. Users can choose to make this attribute required if they want to. By default, it's marked as required.

It will be visible in the following places:

Opportunity c	Customer	120,000 €	80%	Prospecting	20.04.2025	BP	

The **Amount** attribute column will be visible in this list by default.

1.1 Views

Within the list that shows the opportunities attached to a partner (see image below)– users can create different views.

By default we create this one for everyone:

1. All opportunities: This will serve as a view to see everything. Users can play with the filters, sorting, and columns visible.

However, users have the ability to create their own curated lists. How? By saving different views.

This will allow the partner managers to focus on hidden opportunities. Users can play with the filters, sorting, and columns visible.

Views have a name and a set of criteria for what's saved in them:

- Filters
- Column order
- Columns visible

In another document, we'll give more info about the flow of how to create views.

Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	

If there are other views, the `Amount` column can also be there.

1.2 Summed amount

Every list in Qollabi will have a section on top indicating the **summary** of some of the objects below.

When the list includes a numeric field, we can include a calculated summary to display the sum, average, count, and minimum or maximum of the values in that column. The summary field will be calculated for the entire list. We can have one summary row per list.

We will define what those items will be in every list for now. Eventually, you can imagine the users having the ability to define which objects will be summed.

However, users have the ability to create their own views of lists. And sometimes, in the columns they have decided to show, they won't have included an item that will be summed. That means that at the top, the summary section might be empty.

In this partner, you can see he has 100 opportunities attached and each has an amount of 120,000 or something else. So the total amount for the opportunities attached to this partner is 30,000,000.

Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	

- The **summed amount** will change based on the filters applied to the table. So if there are fewer opportunities or more opportunities in the table, the total amount will change.

Naturally, the amount of opportunities/columns/filters in the different views will be different. So, the **summed amount** in both views will also be different. Look at these two examples below:

Import/Export + Add opportunity

100 Opportunities	30.000.000 € Opportunities total amount						
Name	Customer	Amount	Prob.	Stage	Closing date	Plans	Owner
Opportunity a	Customer	120.000 €	80%	Prospecting	20.04.2025	IT BP +2	JD
Opportunity b	Customer	120.000 €	80%	Prospecting	20.04.2025	IT	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	

In this view, you can see the partner has 100 opportunities attached. And each opportunity has an amount of 120,000 or something else. So the total amount for the opportunities attached to this partner is 30,000,000.

Name	Customer	Amount	Prob.	Stage	Closing date	Plans	Owner
Opportunity a	Customer	120.000 €	80%	Prospecting	20.04.2025	IT BP +2	JD
Opportunity b	Customer	120.000 €	80%	Prospecting	20.04.2025	IT	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Prospecting	20.04.2025	BP	

In this other view, he has added a filter on the 'Stage' column to get a more curated list of only opportunities that are still open. So now there are 60 opportunities – which means that the total of the Amount has decreased. It also means that the Count of opportunities at the top has changed.

1.3 Creating views [↗](#)

They can also create their own views, so they can share what they need with their partners. Such as the image below:

Name	Customer	Amount	Prob.	Stage	Closing date	Plans	Owner
Opportunity a	Customer	120.000 €	80%	Closed-won	20.04.2025	IT BP +2	JD
Opportunity b	Customer	120.000 €	80%	Closed-won	20.04.2025	IT	
Opportunity c	Customer	120.000 €	80%	Closed-won	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Closed-won	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Closed-won	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Closed-won	20.04.2025	BP	
Opportunity c	Customer	120.000 €	80%	Closed-won	20.04.2025	BP	

2. The List of Opportunities [↗](#)

Opportunities

All opportunities ▾

Search by name, ... 🔍 Partner Stage Owner More filters

Import/Export + Add opportunity

7000 Opportunities		300.000.000 € Opportunities total amount						
Name	Customer	Partner	Amount	Prob.	Stage	Closing date	Plans	Owner
Opportunity a	Customer	Partner a	120.000 €	80%	Prospecting	20.04.2025	IT BP +2	JD
Opportunity b	Customer	Partner a	120.000 €	80%	Prospecting	20.04.2025	IT	
Opportunity c	Customer	Partner a	120.000 €	80%	Prospecting	20.04.2025	BP	
Opportunity d	Customer	Partner b	120.000 €	80%	Prospecting	20.04.2025	IT BP +3	JD
Opportunity e	Customer	Partner f	120.000 €	80%	Prospecting	20.04.2025	OP	
Opportunity f	Customer	Partner a	120.000 €	80%	Prospecting	20.04.2025	OP CS	
Opportunity g	Customer	Partner g	120.000 €	80%	Prospecting	20.04.2025	IT BP +2	AC
Opportunity h	Customer	Partner b	120.000 €	80%	Prospecting	20.04.2025	IT BP	
Opportunity i	Customer	Partner b	120.000 €	80%	Prospecting	20.04.2025	OP LP	AC
Opportunity j	Customer	Partner b	120.000 €	80%	Prospecting	20.04.2025	IT	
Opportunity k	Customer	Partner b	120.000 €	80%	Prospecting	20.04.2025	OP	AC

The **Amount** column will be visible in all views on the **Opportunities** page by default.

- If there are other views, the **Amount** column can also be there.
- Users can choose to show/hide the Amount column from any of their views.
 - If the **Amount** column is hidden, the Sum will be hidden from the **Summary row** as well.

2.1 Views [🔗](#)

- If there are other views, the **Amount** column can also be there.
- If the **Amount** column is there, the Summary row will indicate the sum inside that list as well.
- The sum might be different depending on the number of opportunities being displayed and their amount value.

3. The List of Partners [🔗](#)

On the List of Partners, users will see the partner records displayed in a table.

Here, they have the ability to show/hide an additional two columns:

1. Opportunities: Shows the count of opportunities attached to each partner.
2. Opportunities total amount: Shows the sum of the amount of each opportunity attached.

These two columns can be filtered by opportunity attributes or TAGS.

System Attributes for Opportunity Entities [🔗](#)

These attributes are **internally tracked** by Qollabi, stored in the backend, and will **not be displayed in the frontend** for now.

Attribute Name	Type	Description
Opportunity ID	Unique Identifier	System-generated ID for the entity. (Read only)
Created By	User	The user who created the Opportunity Entity, with the creation date and time. (Read only)
Created Date	Date-Time	Timestamp of when the entity was created. (Read only)
Last Modified	Date-Time	Modification date and time. This field doesn't track changes made to related list items on the opportunity. (Read only)
Last Modified By	User	User who last changed the opportunity data, including modification date and time. This field doesn't track changes made to related list items on the opportunity. (Read only)
